Tools
VS Code, IntelliJ, Postman, GitHub Action

Languages

French
Maternelle

English
B2

Certifications

CCNA1
Cisco
Mars 2026

Seeking a work-study program in software/web development

2 weeks at the company / 2 weeks at school

I am motivated and curious, and I am eager to get involved in large-scale projects, contribute to technically challenging solutions, and develop my skills as part of a team.

Publications

Personnal Blog April 2026 - Now
I run a blog where I document my personal projects and what I've learned.
blog.baptouk.live

Projects

Pokérixe December 2025 - May 2026
A web application for turn-based Pokémon battles.

The project covers the entire development cycle: user interface design, implementation of a RESTful API, integration of a MongoDB database, and deployment to production. A continuous integration and deployment (CI/CD) pipeline automatically handles the delivery of new versions and ensures code quality with every update.

Homelab 2025 - Now
A self-hosted server running 24/7 on a recycled old laptop. I personally manage the entire infrastructure and host my personal and experimental services on it.

Game of life 2025
Implementation and visualization of Conway's cellular automaton using the C++ language and the SFML graphics library.

Education

Sup De Vinci Bachelor
RNCP Level 6 Certification in IT Project Coordination Nantes • 2024-2027

Lycée Jeanne d'Arc Mathematics and NSI Specializations • Grade: B
General Baccalaureate Brétigny-sur-Orge • 2021-2024

Volunteer

Phénix Event 2022 - Now
Technical Manager

Design and deployment of IT infrastructure (networks, gaming stations, equipment). Tailoring solutions to the specific requirements of each event and venue.

GIV 2022 - 2024
Organization of several video game-related events.

Experience

Knight Night Studio Toulouse
8th-grade field trip Juin 2021
Development of two Android games using Unity and Visual Studio in C#
