Rust, C, C++, C#, python

Front-end

HTML, CSS, TypeScript,
Angular, React, Nextjs

Back-end

Java, Node.js, PHP, SQL,
MongoDB

Infrastructure

Docker, Proxmox, Virtualbox,
OpenSense, Bash, Linux,
Debian, Git

Tools

VS Code, IntelliJ, Postman,
GitHub Action

Languages

French	English
Maternelle	B2

Certifications

CCNA1

Cisco
Mars 2026

Seeking a work-study program in software/web development

2 weeks at the company / 2 weeks at school

I am motivated and curious, and I am eager to get involved in large-scale projects, contribute to technically challenging solutions, and develop my skills as part of a team.

Projects

Pokérixe

May 2026

Creator and full-stack developer of a turn-based combat application deployed to production. Spring Boot 21 backend with JWT, MongoDB, and WebSocket for real-time battle synchronization. Angular/TypeScript frontend, automated CI/CD pipeline with GitHub Actions. Project completed in a team of 4.

Production deployment: pokerixe.baptouk.live

Technical articles: <https://blog.baptouk.live/projects/pokerixe>

Homelab

2025 - Now

A self-hosted server running 24/7 on a recycled old laptop. I personally manage the entire infrastructure and host my personal and experimental services on it.

Game of life

2025

Implementation and visualization of Conway's cellular automaton using the C++ language and the SFML graphics library.

Education

Sup De Vinci

Bachelor

RNCP Level 6 Certification in IT Project Coordination

Nantes • 2024-2027

Lycée Jeanne d'Arc

Mathematics and NSI Specializations • Grade: B

General Baccalaureate

Brétigny-sur-Orge • 2021-2024

Volunteer

Phénix Event

2022 - Now

Technical Manager

Design and deployment of IT infrastructure (networks, gaming stations, equipment). Tailoring solutions to the specific requirements of each event and venue.

GIV

2022 - 2024

Organization of several video game-related events.

Experience

Knight Night Studio

Toulouse

8th-grade field trip

Juin 2021

Development of two Android games using Unity and Visual Studio in C#
